Yes

No

If you have answered 'No' please set out an alternative housing figure and provide reasoning to support your answer.

Somewhere nearer 200 would be appropriated based simply on the facts that there is insufficient infrastructure and services to support the existing population and further development that is beyond infill within existing boundaries will ruin areas of exceptional scenic and natural value.

I would point out that the existing rail services are full to capacity and even proposed increases by South Western Railways will not meet the existing demand

Stalbridge is overrun with heavy lorries an cars battling to get through the town on a narrow restricted nigh street. Adding further development will merely maske this situation more dangerous than it already is and will inevitably result in councilors and officials who approve of any future development liable for prosecution through lack of a duty of care.

20. What are the most important infrastructure requirements that are likely to result from potential future development at Stalbridge?

Please set out what you see as the additional infrastructure requirements.

1. *A ring road that does not have any impact on the Blackmore Vale.*
2. *Improved access through the centre of the town.*
3. *Improved rail capacity especially to London.*
4. *Improved access to the A303 and to trunk roads to the south including new bridges across various rivers including the River Stour on the way to joining the A350 southwards.*
5. *Dramatically improved broadband and mobile phone connection.*
