

Inspector's Question 2 to the Council

Ministerial Statement on Support for Small-Scale Developers,  
Custom and Self-Builders

A ministerial statement was made by Brandon Lewis MP and published in early December. It sets out measures aimed at unlocking small-scale development and boosting their attractiveness of brownfield sites, particularly by making changes with regard to Section 106 planning obligations.

Could the Council comment on whether or not, in its view, the content of the Statement has any implications for the Local Plan of which I should be aware. A copy of the Statement, this question and the Council's response should be added to the Examination library.

A response within two weeks would be welcome.
