

Inspector's Question 4 to the Council

The Sustainability Credentials of Stalbridge and the District's Villages

Could the Council provide a list of the District's villages (including Stalbridge) indicating what community services and facilities are currently available. For example schools, shops, public houses, community halls, sports pitches/recreation grounds, healthcare services, churches and library facilities (including mobile library).

It would also be helpful to have:

- an indication of any employment opportunities that may be available within or near to the settlements; and
- a plan showing any bus routes that serve these settlements (including frequency) and any other information regarding the provision of sustainable transport services to the villages.

This question and the Council's response should be added to the Examination library and a response within two weeks would be welcome.

David Hogger

Inspector
